现对以下职位进行公开招聘，欢迎公司的同事推荐简历。

Position：Intern

Department：Clinical Biometrics

Line Manager: Statistical Science Lead

Location：Beijing / Shanghai

Full-time internships are available in the summer of 2026 for 10–12 weeks.

Responsibilities and Accountabilities

1.Work closely with a senior-level statistician and/or a real-world data expert on the design and analysis of clinical trials, observational studies, epidemiology, and statistical research topics.

2.The project will be a hands-on learning experience involving statistical and related data review and data analysis programming tasks.

3.The programming tasks will involve SAS, R, Python, and/or other statistical software on the UNIX platform.

4. Legally authorized to work in China.

Required Qualifications

1.Completed a bachelor's degree or equivalent and/or a master's degree,

2.Be currently working towards a PhD in statistics, biostatistics, mathematics, epidemiology, or related discipline.

3.Good programming skills, as noted above, and good communication skills.
