We use appropriate technical and organisational measures to protect the personal information that we collect and process about you. The measures we use are designed to provide a level of security appropriate to the risk of processing your personal information.

International data transfers

Your personal information is transferred to, and processed in, countries other than the country in which you are resident. These countries may have data protection laws that are different to the laws of your country (and, in some cases, may not be as protective).

Specifically, the servers that we use to host your personal data are located in the UK, and our group companies and third party service providers and partners operate around the world. This means that when we collect your personal information we may process it in any of these countries.

However, we have taken appropriate safeguards to require that your personal information will remain protected in accordance with this Privacy Notice. These include implementing the European Commission's Standard Contractual Clauses for transfers of personal information between our group companies, which require all group companies to protect personal information they process from the EEA in accordance with European Union data protection law.

Our Standard Contractual Clauses can be provided on request. We have implemented similar appropriate safeguards with our third party service providers and partners and further details can be provided upon request.

Data retention

We retain personal information we collect from you where we have an ongoing legitimate business need to do so (for example, to provide you with a service you have requested or to comply with applicable legal, tax or accounting requirements).

When we have no ongoing legitimate business need to process your personal information, we will either delete or anonymise it or, if this is not possible (for example, because your personal information has been stored in backup archives), then we will securely store your personal information and isolate it from any further processing until deletion is possible.
